	Rotating Element LD17 CS/A20		628943	
	Rotating Element LD17 CS/HC		685255	
	Rotating Element LD17 CS/HB		628333	

Note: Original design uses 5310 thrust bearing and shaft is 1.125" at the coupling end.

If ordering a shaft assembly or a rotating element for an original ANSI Fame-A power end, it is highly recommended that the power end be converted to the current standard with angular contact thrust bearings. This can be accomplished by using a current design rotating element (as listed above), thrust labyrinth seal, and a new coupling half for the larger shaft diameter.

Parts required to convert ANSI Original FR A Power End (1.125" cplg. end) to current design (1.375" cplg. end):

1 ea Rotating Element FRA CS/316	364152	(or as appropriate for options)
1 ea Thrust Lab seal Stationary 1.50" NPS**	364238**	
1 ea Thrust Lab Seal Rotary 1.50" 316SS	090697	
1 ea Coupling half for 1.375" shaft	by others	

** If cartridge is also being replaced, this item is unnecessary.

Ref #9 Suction Cover Assemblies for Vortex Pumps

Does not include gasket (73B).

Includes Jackinf Screw (098278).

Vortex Frame-A and LD17 SPARE PARTS

REF #11 Back Cover Assemblies for Frame-A

Cover includes integral seal chamber and is backwards compatible with old two piece design.
 Cover assembly does not include gasket (73A).
 Cover assembly machined for bushing does not include bushing.
 Cover assembly machined for jacket does not include the jacket.
 Cover assembly machined for tap includes plug for tap (361388). CN7M, HB, HC covers use same alloy plugs.

Bush/Other options	DI	CF8M	CD4MCu	CN7M	HB	HC
